Sample Infosys ESG Report 2023

Synthetic Annual Sustainability and BRSR-style Extract

This document is an artificial sample created for testing PDF ingestion, page-number citation, chunking, and RAG retrieval workflows in the ESG Sentinel project. It is not an official filing and should not be used for investment or compliance analysis.

Metric	FY2021	FY2022	FY2023
Scope 1 and 2 emissions (tCO2e)	126,400	112,800	96,500
Renewable electricity share	54%	68%	82%
Water withdrawal (kilolitres)	1,980,000	1,760,000	1,510,000
Women in workforce	38%	39%	41%

Management Commentary

During FY2023, the company continued to reduce operational carbon intensity through renewable electricity procurement, energy efficiency upgrades across campuses, and improved data-center utilization. The company reports a year-on-year decline in Scope 1 and Scope 2 emissions, primarily due to higher renewable power adoption and consolidation of office energy demand.

The water stewardship program focused on rainwater harvesting, wastewater recycling, and campus-level monitoring. Total water withdrawal declined from 1.76 million kilolitres in FY2022 to 1.51 million kilolitres in FY2023. Recycled water was used for landscaping, cooling, and sanitation in major campuses.

Environmental Performance

The environmental pillar covers emissions, renewable energy, water, waste, biodiversity, and climate risk governance. In FY2023, environmental initiatives were aligned with a long-term decarbonization pathway and internal resource-efficiency targets.

Greenhouse gas emissions decreased by approximately 14.5 percent compared with FY2022. Renewable electricity represented 82 percent of total electricity consumption. Energy audits were completed at six large campuses, identifying efficiency measures for HVAC systems, lighting, and server room cooling.

Water consumption improved due to expanded metering and reuse systems. The company reported zero untreated wastewater discharge from owned campuses. Waste diversion from landfill reached 91 percent in FY2023, supported by source segregation and vendor traceability checks.

Environmental indicator	FY2023 value	Status
Renewable electricity	82%	Improved
Waste diverted from landfill	91%	Improved
Untreated wastewater discharge	0 KL	Maintained
Climate risk review	Board-level review completed	Improved

Social Performance

The social pillar covers workforce diversity, employee safety, training, community development, data privacy, and customer responsibility. In FY2023, women represented 41 percent of the workforce, up from 39 percent in FY2022. The company expanded leadership development programs for women employees and increased accessibility initiatives across offices.

Employee learning hours averaged 64 hours per employee during the year. The company reported no work-related fatalities among full-time employees. Supplier assessments included checks on labour practices, health and safety compliance, and human rights policies.

Community programs focused on digital literacy, STEM education, rural entrepreneurship, and healthcare access. The company reported that 2.4 million beneficiaries were reached through foundation-led initiatives in FY2023.

Governance Performance

The governance pillar covers board independence, audit oversight, ethics, cybersecurity, executive compensation, and shareholder rights. The board maintained a majority of independent directors in FY2023. Audit and risk committees reviewed cybersecurity posture, data protection controls, and enterprise risk indicators each quarter.

The company conducted annual code-of-conduct training for employees and maintained a whistleblower mechanism with direct escalation to the audit committee. No material governance penalties were reported in this synthetic sample period.

BRSR-style ESG Notes

Principle 2: The company reports that products and services were designed with attention to resource efficiency, cybersecurity, and customer privacy. Data protection controls were reviewed against internal security standards.

Principle 3: Employee well-being programs included preventive healthcare, mental health counselling, hybrid-work support, and safety training for facility teams. Attrition remained a monitored management priority.

Principle 6: Environmental responsibility was tracked through emissions, energy, water, and waste metrics. The company prioritized renewable energy contracts and campus-level conservation projects.

Principle 7: Public policy engagement was governed by internal approval processes. The company did not make direct political contributions in FY2023 in this synthetic sample.

Sample citation targets for testing: carbon emissions trend appears on page 2; workforce diversity and governance commentary appear on page 3; BRSR-style principle notes appear on page 4.
